

# features & benefits of leasing with

## corporate+medical finance limited

Leasing could be the cheapest and quickest route to acquiring the equipment your business needs. Our leasing options allow you to keep full control of the equipment at all times with no hidden costs.

- **Reducing your costs**

A typical business could reduce the cost of acquiring equipment by 22% using leasing.

- **Minimum cashflow impact**

Healthy cashflow is vital, especially when acquiring new equipment. Our lease facilities often require little or no initial deposit, allowing you to keep hold of more of your cash.

- **Flexibility**

No matter what contract term you choose, options are always available to upgrade or add further equipment. When you reach the end of a contract by completing the term or settling early, you retain full control of what happens to the equipment with no hidden costs.

- **Maximise growth, minimise risk**

Improve your business and stay ahead of the competition by spreading the cost of new equipment into fixed, affordable monthly payments. Keep your cash, bank credit lines and personal finances intact for emergencies and other uses.

- **Get a no obligation offer**

We are happy to provide an approved written offer for you to consider alongside any other options you may have. Offers typically last for up to 3 months.

- **Common sense underwriting**

All applications are considered on a case by case basis. Simple enquiries can be approved immediately with more complex applications taking up to a working day. We rarely say no.

- **Competitive rates and terms**

We benefit from access to the leading banks and finance houses in the UK. This means that no matter what your situation, we can offer the best rates and terms available.

- **Fast and friendly service**

Collectively we have years of experience and knowledge to offer. We strive to make things as simple as possible at all times, when dealing with us.
